Subject: Request from USCG to Present info on Portland Harbor and Zidell on July 26 at 7:30pm

Jim and Chip,

Are you available on July 26 at 7:30 PM to give presentation to US Coast Guard? A suggested agenda to cover his topics is below. The FS presentation slides have majority of information requested.

Agenda:

- Where are we in the process? What have we learned from the risk assessment and remedial investigation? (EPA) 15min
- Discussion of source control (DEQ) 15min
- Human and ecologic risk concerns (EPA) 5min
- Zidell site history, clean-up, & future use (DEQ) 20min
- Potential areas for USCG involvement along Portland Harbor - What should they look for when patrolling terminal areas? (EPA & DEQ) 5min

Let me know.

Thanks

Alanna,

I am sorry I haven't returned your email promptly.

Our meetings start at 7:30 PM as stated below, on the fourth Thursday of the month.

What we would be interested in is information about the progress of the Superfund, it's targeted areas, and chemicals in the port. Where we are at, and where we intend to be. Some history of past clean up (Zidell), time and costs. Where funding is allotted

from. Pretty much, who you are and what you do. Then let us know how we can help you. Such as things we can look for when patrolling the terminal areas.

Hope this helps.

Hello Todd,

I return to the office on Monday and will check into who would be best contact for presenters. Are you specifically interested in an update on Zidell, a Harborwide update, or combination of the two? What time on third Thursdays are your meetings?
I have copied Mr. Jim Anderson of Oregon DEQ also.

Thank you,
Alanna

Alanna,

Hello, I am Todd Miller, the FSO-MS of the Coast Guard Auxiliary Flotilla 78 in Vancouver, WA.

I am writing in hope that someone from the Superfund Clean Up group, might be able to come to our member training to give a talk.

We would be interested in the process of clean up, and the area of Portland Harbor. Possibly, as the likes of the progress and completion of the Zidell Ship Yard. It would help our crew's awareness of your projects, and how our facilities may help monitor

the waterways in these project areas.

Our meetings are in the evening on the third Thursday of the month, in Vancouver at the Fish and Wildlife building. We were hoping to get a commitment for the September meeting.

Please feel free to contact me anytime. I look forward to hearing from you in the near future.
